

EUROBODEN
ARCHITEKTURKULTUR

CURRICULUM VITAE | STEFAN F. HÖGLMAIER

Stefan F. Höglmaier was born in Munich in 1974. He discovered his passion for architecture and an interest in the economics of real estate at an early age. In 1999, he founded Euroboden GmbH, and in doing so created the first architecture brand in the real estate industry. Through the intuitive application of his own creativity and architectural skills, he realises his vision – which is to make the potency of architecture tangible.

Stefan F. Höglmaier is avant-garde in both his approach and cultural commitment, something that can be seen in the art room "Euroboden Positionen" at his Hochbunker (above-ground bunker).
