

EUROBODEN
ARCHITEKTURKULTUR

STEFAN F. HÖGLMAIER | CURRICULUM VITAE

Stefan F. Höglmaier (born in 1974) discovered his passion for architecture and an interest in the economics of real estate at an early age. The entrepreneur initially spent over five years as a service provider in the area of concept development and sales, where he influenced numerous real estate developments with his sensitivity and knowledge of the market.

He founded Euroboden GmbH in 1999, and in doing so created the first architecture brand in the real estate industry. Stefan F. Höglmaier is still sole shareholder in the prosperous medium-size enterprise and embodies the Euroboden brand. His real estate projects are always architectural projects bearing the stamp of his personal values. The BNKR art room in the above-ground bunker he converted extends his cultural commitment into other disciplines.
